Thanks for the change and the info, Christine!

I'm not sure if we are updating the Pavillion home page today. It's been incredibly complicated--too much to go into in an e-mail. :)

See below. Did you update the Pavillion page today? I don't see anything new in the What's New section. Looks like from the last updated date that you updated something, but I can't find it on the page.

Also in the contacts section, Larry Jackson is mentioned. He has left the agency. His replacement is Dave Cohen.

Subject: New hydraulic fracturing groundwater test results in the news

Hi Christine,

I've come across several news items this morning about new hydraulic fracturing groundwater test results from Pavilion Wyoming that are due to be released today. According to what I've read, the study has been conducted by the US Geological survey in conjunction with the US EPA. I've also read the EPA may release the results later. Do you know of any new documentation coming down the pike? Will the information be available via the hydraulic fracturing homepage?

Best,
 Alison
